Team ID	PNT2022TMID22530
Project Name	Nutrition Assistant Application

The screenshot shows the RapidAPI interface for the 'Recipe - Food - Nutrition' API. The page is dark-themed and includes a search bar at the top. The API is listed as 'Recipe - Food - Nutrition' by David, updated 9 days ago, and is featured in 'Food & Restaurant'. It has a popularity score of 9.8 / 10 and 71 reviews. The user 'DineshKumarks' is logged in, with their email '113119UG07019@smartinternz.com' visible. The page includes links for 'Endpoints', 'About', 'Tutorials', 'Discussions', and 'Pricing'. The 'Endpoints' section shows a list of endpoints, with 'GET Search Recipes' selected. The 'Code Snippets' section shows a code snippet for using the API with Axios. The 'Results' section is empty.

Recipe - Food - Nutrition API Documentation

The spoonacular Recipe - Food - Nutrition API gives you to access to thousands of recipes, storebought packaged foods, and chain restaurant menu and semantic recipe search engine makes it possible to search for recipes using natural language queries, such as "gluten free brownies without sugar cupcakes." You can automatically calculate the nutritional information for any recipe, estimate recipe costs, visualize ingredient lists, find recipes for what's in your fridge, find recipes based on special diets, nutritional requirements, or favorite ingredients, classify recipes into types and cuisines, convert ingredient amounts, or even compute an entire meal plan. With our powerful API, you can create many kinds of food and nutrition apps.

Special diets/dietary requirements currently available include: vegan, vegetarian, pescetarian, gluten free, grain free, dairy free, high protein, low sodium, low carb, Paleo, Primal, ketogenic, and more.

GET Search Recipes

Search through thousands of recipes using advanced filtering and ranking. NOTE: Since this method combines searching by query, by ingredients, and by nutrients into one endpoint, each request counts as 3 requests.

```
(Node.js) Axios
const axios = require("axios");

const options = {
  method: 'GET',
  url: 'https://spoonacular-recipe-food-nutrition-v1.p.rapidapi.com/recipes/complexSearch',
}
```
